

FOREWORD

The Annual Fisheries Statistics is an annual bulletin produced by the Department of Fisheries as the main source of reference on vital informations on the Malaysian fisheries industry. These informations include figures on fishing boats, fishermen, fishing gears, fishing efforts and productions of the industry.

Since these informations are compiled and processed from large data collected throughout the country, considerable amount of time is involved. As such this bulletin was normally produced at the end of the year. However due to early requirement, the processing time is reduced at no expense of accuracy except for data on import/ export of fishery commodities which we have to depend on other sources.

Due to the urgency of the fisheries statistics and the inavailability of the import/export data as yet, this bulletin is produced in two seperate volumes. The first volume, which is this book, covers all aspects of the fishing industry except informations on the import/export of fishery commodities. The second volume which consists of the latter statistics will be circulated later.

In our effort to improve our service to the industry, we hope that the early circulation of this bulletin could be beneficial to all.

Thank You.
